INTRODUCTION

THE CONCEPT OF THE SOVE LONÈ POLICY PLATFORM

Derived from the fact that Haiti, after two hundred years, a nation that should be the light and salt of the earth, represents for some foreign detractors a "basket case" and for others a "shitty land". Without accepting the characterization of its detractors, we Haitians have betrayed the mission and the wishes of our founder Jean Jacques Dessalines who left us this message:

GENERAL JEAN JACQUES DESSALINES,
LIBERATOR OF HAITI.

"I have spent whole nights sleepless to give you this piece of land, take good care of it so that it can become a well-kept treasure for each of you and a light for mankind. "

Despite our descent into hell, especially this vertiginous descent of three decades, we can and must go *upstream to Save the honor of Haiti for our ancestors and for our children.*

PPSL will establish true democracy in Haiti, from its Greek origin, democracy which means, (demos / cratos), power by the people for the people. Power must flow from the people for the benefit of the people.

This is why the Sove Lonè / PPSL Political Platform will seek the empowerment of the people to finally meet the needs of the Haitian people after two hundred years of state malevolence towards the majority of the population. How? 'Or' What ?

n° 1

IN EDUCATION

Haitian children will be taken care of by the Haitian state, from kindergarten to university. Haitian families will have **NOTHING** to pay. Books, shoes, uniforms

and instructional materials will be provided free of charge to parents by the state. Two hot meals, in the morning and at noon from local products, will be offered free of charge every day of class to Haitian children.

The Haitian government will do so, because it believes that Haitian youth represent the future of the country. By supporting the youth, the Haitian state prepares those who will pay the taxes of tomorrow to enrich the nation. It is an investment for the future. PPSL will spend \$ 1 billion from the Education Fund, to build 10 universities / one in each department that can accommodate 15,000 students each; *a high school of 5,000 students in each municipality, each accompanied by an industrial school campus and finally a primary-higher school of 500 students in each of our*

approximately 600 rural sections.

n° 2

IN SECURITY

The Haitian state through its army and local police will ensure the security of property and people throughout the country. There will be no more ghettos and places of no place, neither in the cities nor in the countryside. **PPSL** believes that the devaluation of the human person leads straight to gangsterism and insecurity. We want and we will empower each citizen with education, learning and rehabilitation to erase this wave of insecurity that pervades the entire Haitian space. You will see later the manifestation of this public policy in the creation of wealth for all and in the construction of healthy houses, especially for the poorest in our rural sections and in the communes.

n° 3

IN CREATION OF WEALTH

PPSL will use 8 vectors of wealth creation to ensure that every Haitian without education today who seeks productive employment will find it in their different areas:

- a- agriculture, organic for large foreign markets, high-end and nostalgic for our Diaspora.
- b- The seed, planting and protection of precious trees like mahogany, cedar and chain for our Sovereign Fund
- c- Utility art for the international market.
- d- Religious and rural tourism drawn from the festivals of saints and the pioneer character of Haiti.

- e- Essential oils.
- f- Care for the elderly around the world / old aged home health aid.
- g- Haiti under construction, a Haiti that is rebuilding all its institutions and putting in place an adequate infrastructure from Hamlet to the capital.
- h- The production of fish and hens for the local and international market.

n° 4

IN SECURE HABITAT

PPSL will ensure that every Haitian citizen, especially those who live in rural areas, lives in adequate and secure accommodation which will also serve as a lodge for tourists from all over the world during country festivals bringing wealth and security to the rural Hamlets of 'Haiti

n° 5

IN THE ENVIRONMENT

PPSL will use Haitian debt primarily the Petro Caribe debt to explore the concept of the rehabilitation of the Haitian space. We will adopt the debt swap for environmental projects (debtswapping for nature) as did a dozen nations in this case: Madagascar, Zambia, Bolivia, Costa Rica, Dominican Republic, Poland, Nigeria, Brazil, Panama, Cameron and the Philippines. With a fund of 4 billion dollars transferred in real value for debt swap we will fill our hill after hill with precious woods such as chain, mahogany and cedar as well as fruit trees that will help us create a green Sovereign Fund. bottomless for the future happiness of future generations.

n° 6

IN YOUTH LEADERSHIP

PPSL considers the Haitian youth as a human reservoir for the continuity of the nation, so they will be supervised with monitors in education and civic practice, athletics, sport, proper protocol, engineering exercises and foreign language. This supervision will be done throughout the year but especially during the holidays.

n° 7

IN GOOD GOVERNANCE AND ANTI-CORRUPTION

PPSL will seek and use the funds of the Millennium Challenge Grant to establish good governance in Haiti. Government employees will be retrained in the theory and practice of service and ethics. Each year on January 2, the Haitian State will officially reward CASECS, mayors, deputies, senators and ministers who have distinguished themselves in the accomplishment of their task. A unit of the Superior Court of Accounts will be installed in each ministry of the state to ensure that the entries and expenditures of the department comply with the ethical and property protection practices of the State of Haiti.

n° 8

IN FRAMEWORK OF THE DIASPORA

The Haitian Diaspora will represent a true extension of the Haitian family of the mother country, those who are in difficulty in foreign lands will be repatriated and placed in ideal conditions for their development. The Diaspora will be invited to bring their assets and their knowledge to the motherland for its development. The new Haitian Constitution will have all the necessary modifications so that not only Haitians of origin but also their offspring enjoy legal and civic rights in Haiti.

n° 9

BY PROTECTING OUR NATURAL AND MINING RESOURCES

PPSL believes in teaching the Haitian nation first about the protection and conservation of its mineral resources so that it is no longer exploited in a way that future generations are freed from their resources in the future. Also she will study the laws of nations like Norway which have been able to use while conserving their natural resource.

n° 10

IN ADEQUATE INFRASTRUCTURE

It will establish 10 PPP, public and private partnership that will provide the Haitian population with all the infrastructure in road, bridges, airports, irrigation, waste treatment, electricity, communication, cabotage, public transport, pipeline etc. The Haitian state will come to an agreement with the private sector to invest massively in all the areas mentioned above. We will ensure that the Haitian, regardless of where he is in the national territory, has easy access to any kind of infrastructure and institutions that will prevent him

from becoming a nomad in his country or abroad. For example
:

- a- In the area of electricity, the Haitian State will take advantage of the fact that we do not have a national electricity grid, to facilitate each Haitian family to build its own solar electric installation. In addition, it will dike with environmental precautions all rivers throughout each department to produce green energy for industrial consumption. In terms of the environment, the Haitian family will have the opportunity, with the transfer of technology, to fill their own propane gas tank through the decomposition of their organic waste.
- b- In the field of transportation, the chaotic hustle and bustle of public transport will be replaced by private entrepreneurs in business with the government (ppp) who will provide them with first-class vehicles for the satisfaction of users.

- c- Each department of the country will have its own international airport which will connect its Diaspora with the motherland, facilitating tourists and Haitians with easy access abroad.
- d- In the area of drinking water, every city, every rural Hamlet will have access to drinking and running water in every house like you find in any industrial country.
- e- Considering that most of the cities are coastal, PPSL in power will promote cabotage with well-built ports for the satisfaction of passengers in all our small coastal towns.

n° 11

IN JUSTICE

PPSL will be the promoter of fair justice with justice having the last word in personal and public transactions as a compass. Pre-trial detention will be resolved with emergency prison courts to deliver clear and enlightened justice for those languishing in prisons without having seen their natural judge to rule on their case. The administration of the Tribunal will be done according to a protocol that we find in all industrialized countries and according to the standards established by law and decorum. The major legal irritants of the Haitian population will be taken care of. Irritating as the lack of justice over the Petro Caribe Trial, the stranglehold of state tenants on state resources, the confiscation of land and private property from citizens, the kidnapping will be resolved firmly and definitively.

n° 12

IN AGRICULTURE

Agriculture is the privileged occupation of the Haitian mass. Also PPSL will take special measures in technology and finance to supervise the Haitian farmer. She plans to use the 90 farm labs to support farmers and those who want to get into farming to succeed. Special attention will be placed in organic and seasonal agriculture for our Diaspora and for high-end stores in the country and abroad, for example we will seek to produce in quantity and quality for local consumption and abroad. citrus and Congo peas during the winter, soursop, cachiman and tamarind during the spring, mangoes, apricots

and pomegranates during the summer, and finally avocados, quenèps and cherries during the fall. While practicing large scale cocoa and coffee plantation as well as fields of precious woods like mahogany and cedar for our Sovereign Fund.

n° 13

IN TOURISM

Haiti, like the counterpart of the Caribbean, has not been able to take advantage of its geographical position from the tourist influx in the region because of its poverty and recurrent political unrest. PPSL intends to project the image in the world, that Haiti is the Tahiti of the Atlantic, as the latter is a corner of reference in the Pacific. We will take advantage of our cultural and historical assets to position Haiti as the Mecca that all lovers of freedom must visit at least once in their life. In addition we will invite Catholics from all over the world to come and immerse themselves in our feasts of medieval saints. A practice that is lost with time and industrialization in the rest of the world.

n° 14

IN HEALTH

PPSL intends to provide a secure health card to every Haitian citizen so that he can obtain curative care in hospitals and health centers and in mobile medical vehicles. Our university hospitals in the capital and the provinces will maintain a direct and formal link with the hospitals of the communes and the health centers of the rural sections. We will give special attention to our grassland knowledge not only for ourselves but also to share this scientific material with the rest of the world in profitable conditions for the country.

n° 15

EN URBANISATION

In urbanization, **PPSL** will promote the integral development of our 142 towns and cities. In addition to the central government input, we will stimulate the **Pote Kole** project for the urbanization of cities. The inhabitants of the city, those of the Diaspora as those of the mother country will be invited to contribute 100 dollars per year in a communal fund which will be managed jointly with the leaders and the town hall of the commune. Urbanization works such as the construction and maintenance of sidewalks, garbage collection, development of parks, markets, bus stations, public transport, etc. will be discussed and founded with local participation. Prizes will be awarded by the Haitian state to cities and municipalities that have distinguished themselves, in the organization and good use of the communal fund.

n° 16

IN FAIR AND UNIVERSAL TAXATION

PPSL proposes a national and international taxation that will be fair and will extend to all Haitians regardless of where they reside in the territory and throughout the Diaspora. However, the tax collected from Haitian residents abroad will be deducted from their income. So this tax will not be paid twice. The Haitian government will enter into a taxation agreement with the state where the Haitian citizen resides so that Haitian taxation is a deduction from the tax payable in foreign land. Taxation on the national territory will be extended to all citizens, rich and poor, since the Haitian state will be an entity

firmly committed to building wealth for each individual of working age.

We thus intend to present a national budget in the order of 1 trillion gourdes or 13 billion US dollars for a growth of 6% against the meager budget of today which represents only 1.5 billion dollars with a growth of -1%.

CONCLUSION

PPSL intends to resume the Society project, "the project of happiness for all" conceived by Toussaint Louverture and John Adams of the United States in 1800 to bring happiness to their respective countries and to extend the concept throughout the world as Pope Francis did to us. instructed in his Encyclical Fratelli Tutti. Jesus Christ had come to earth not only to redeem us from original sin but He also came to teach us that happiness can now be acquired on earth with men and women of good will.

To succeed

The SOVE LONE Political Platform, based on the concept of how to build a good nation / "nation building" formulated by historian Ernest Renan in 1883, wants to show the way forward so that Haiti once again becomes the Pearl of the United Nations. West Indies and the light on the hill for the other peoples of the earth who want to embark on the path of building a good nation for all.

- 1- **PPSL** intends to instill and stimulate the feeling of belonging among all Haitian citizens so that they cling to their land and their homeland according to the wishes of the Founder.
- 2- **PPSL** will build excellent infrastructure and healthy institutions throughout the country so that Haitian citizens cease to be a nomad in their territory and abroad.
- 3- **PPSL** will promote affirmative actions towards the most disadvantaged segments of society such as the

rural world, the world of urban ghettos and the world of women so that they catch up as quickly as possible those who have already reached the status of middle class.

- 4- **PPSL** will help Haiti to regain its divine mission, the mission of emancipatory nation flying to the aid of nations in internal struggle in the world as well as Haitians in difficulty in foreign lands.
- 5- **PPSL** will teach the youth that nation building is continuous work. It will have to work with resilience, creativity and education to make the nation more and more beautiful and strong. PPSL will also practice the concept of true democracy, one which requires that political alternation be a necessary step, political leaders must no longer cling to power for themselves and their needs without taking care of the needs of the people.

PPSL intends to base its economic, political and social praxis on the following bases:

- 1- The political doctrine of Toussaint Louverture which outlined "happiness for all" as the objective of all good government. And strangely it is also the doctrine as Pope Francis taught us in the encyclical, Fratellini Tutti, Jesus Christ came to earth not only to redeem original sin but also to show us that happiness on earth is also in the divine plan for all men and women.
- 2- It is also based on the doctrine of Jean Jacques Dessalines who taught us that "those who have no descendants from France must also enjoy the national heritage" Without grumbling and in the fraternal spirit we must practice towards them love, sharing and brotherhood.

- 3- **PPSL** is based on the doctrine of Ernest Renan which imposes on us in building a good nation according to the 5 principles mentioned above.
- 4- Last but not least, PPSL in building the good nation is based on the developing economic principles of American economists Pavlina Tchernera and Eric Tymoigne de Bard College on Economic Theory: Modern Monetary Theory / MMT. A nation that has seigneurial control of its currency has no limit in its spending except on the human and natural resources of its territory by respecting all the standards of good governance without corruption and without illegality. Japan and the United States today use this theory in their development.

May God protect Haiti and may God protect Haitians, those of the Diaspora as well as those of the mother country!
